

DATA IS EXPLODING. Your organization is racing to keep up, especially in the cloud. The risks are real and rising.

Data Governance & Protection (DSPM)

Virtual Guardian's Data Governance and Protection cloud assessment is your solution to gaining control. Powered by IBM's Guardium, we help you:

Discover	Identify	Analyze
Uncover hidden data within your cloud environment.	Pinpoint sensitive information like PHI and PII.	Understand data flow to detect vulnerabilities.
Automate	Uncover	Comply
Simplify data management.	Find and fix weaknesses in your data stores.	Ensure regulatory compliance with clear visibility reports.

Our agentless solution connects directly to your SaaS data repositories, providing **continuous monitoring** and peace of mind. **Protect your organization's future with Virtual Guardian.**
